

Assign

- 1) $x = (24, 25, 26, 27, 28, 90, 100, 1000, 1200, 1400, 1400, 1400)$
Find mean, median & mode.

$$\text{Mean } (\mu) = \frac{24 + 25 + 26 + 27 + 28 + 90 + 100 + 1000 + 1200 + 1400 + 1400 + 1400}{12}$$

$$= 560.$$

$$\text{Median} = \frac{90 + 100}{2} = \frac{190}{2} = 95,$$

$$\text{Mode} = 1400,$$
